GXP1400/1405 **Small-Medium Business IP Phone**

GXP1400/1405 is a next generation small-to-medium business IP phone that features Linux operating system, 2 lines with 2 SIP accounts, a 128x40 graphical LCD, 3 XML programmable context-sensitive soft keys, dual network ports with integrated PoE (GXP1405 only), and 3-way conference. The GXP1400/1405 delivers superior HD audio quality, rich and leading edge telephony features, personalized information and customizable application service, automated provisioning for easy deployment, advanced security protection for privacy, and broad interoperability with most 3rd party SIP devices and leading SIP/NGN/IMS platforms. It is a perfect choice for small-to-medium businesses looking for a high quality, feature rich IP phone with affordable cost.

Feature Highlights

- 128x40 pixel graphical LCD display
- 2 line keys with dual-color LED (2 SIP accounts and up to 2 call appearances), 3 XML programmable context-sensitive soft keys, 3-way conference
- HD wideband handset, hands-free speakerphone with advanced acoustic echo cancellation
- Phonebook with up to 500 contacts and call history with up to 200 records
- Automated personal information service (e.g., local weather), personalized music ring tone/ring back tone
- Dual switched auto-sensing 10/100Mbps network ports, integrated PoE (GXP1405 only)
- Automated provisioning using TR-069 or AES encrypted XML configuration file, SRTP and TLS for advanced security protection, 802.1x for media access control

Panasonic

UT670

KX-UT670 shown

A Smarter Phone for the Desktop

The award-winning KX-UT670 is equipped with a large, 7-inch LCD touchscreen allowing easy access to features and installed applications. The open-source operating system is programmable in Java enabling development of third party business applications. Users can browse the web, access email and check daily calendar appointments right on the phone. The UT670 can also sync with up to 16 Panasonic network security cameras so you can monitor live security video directly from the phone.

Open Source Platform Certification

Like all phones in the Panasonic SIP lineup, the UT Series is certified for Use with BroadSoft® BroadWorks®, Digium® Asterisk®, Metaswitch, Brekeke and many others*. Panasonic SIP phones are a proven, cost-effective endpoint solution for small to mid-size companies utilizing the latest in Hosted and Open Source PBX technology.

*Consult your Panasonic representative for a complete, up-to-date list.

Conferencing Solutions

The convenient 3-Way Conferencing feature, available on all UT series phones, will help you save time and resources. A paging function lets you quickly get two colleagues on the phone with you for a conference even if they're located at opposite ends of the country.

Low Total Cost of Ownership

The UT Series is designed to complement your existing communications infrastructure, yielding a low TCO and maximizing ROI. Select models feature a second data port, so you can connect a second device to the network without the time and expense of running additional Ethernet cable. All UT Series models are PoE ready, thus eliminating the need for adaptors and saving on electricians' fees. An energy-saving Eco Mode feature lets you lower power consumption while a comprehensive, two-year limited warranty protects your investment well into the life of the phone.
